PROFILE

Motivated front-end developer with a solid foundation in JavaScript, React, HTML, and CSS, along with experience using frameworks like SASS, Tailwind, and Styled Components. Skilled in building responsive, user-friendly applications and creating dynamic components with modern tools like React, Next.js, and TypeScript. Hands-on experience managing state and optimizing performance. Strong team player, focused on writing clean, maintainable code, and eager to stay updated with industry trends. Contributed to various projects at Picsart Academy and personal projects.

PROJECTS AND EXPERIENCE

Software Engineer, Front-end Developer

Picsart Academy projects

- Picsart Mini Apps: A project where mini apps on the Picsart website allow users to create various things, accessible on all device sizes. I used the Picsart UI to ensure design consistency, optimizing the apps for responsiveness and performance while incorporating user feedback to improve usability.
- Joben: A website specialized for IT specialists to find jobs that suit their needs and skills. I built a responsive, user-friendly frontend using React, CSS, ensuring smooth integration between the frontend and backend.

Projects

- E-commerce: This full-featured website uses React for the frontend, Express for the backend, and MongoDB for data storage, all deployed with PM2 for efficient management.
- User Form App: I created a user form application in React, utilizing Yup for form validation and React Toastify for displaying notifications. The app ensures smooth user data submission with real-time validation feedback and clear confirmation messages upon successful input.

JOB POSITION

IT COMMUNITY ARMENIA ● Internship   2024 Nov - present

Developing and maintaining web applications with a focus on creating responsive and user-friendly interfaces using React, writing clean and maintainable code while optimizing performance for React components, gaining hands-on experience with modern frontend development tools and libraries, enhancing skills in JavaScript, React, and component-based architecture.

Kamurj UCO CJSC   2021 Oct - 2023 Jul

As a loan specialist at Kamurj, I assessed clients' financial profiles, determined loan eligibility, explained terms, and guided them through applications. I also analyzed data for risk management and offered tailored recommendations to benefit both clients and the company.
